

HOW TO USE YOUR RAYPAK ILLUSTRATED PARTS LIST

The Model Number, of a Raypak boiler, is found on the Rating Plate for the Boiler. Each Model number identifies the application, the construction and the function of the boiler and provides a positive means of providing information, both installation and service, and parts in a minimum amount of time. The example, shown below, should be used as a guide to identifying your boiler.

Model No: H3 - 1631

Now find the part you need in the exploded view drawing. After you find the part you will notice a number and letter next to the part. See Drawing below. This is referred to as a "Call Out".

The number serves as a "Finder" number and has no specific part classification.

The letter serves as a "Part Class" identification number. The letters stand for specific groups of parts - see Example below.

- | | |
|-------------------------|-------------------|
| B - BURNER TRAY | M - MISCELLANEOUS |
| C - CONTROLS | P - PILOT |
| G - GASVALVES | R - REFRACTORY |
| H - HEAT EXCHANGER | S - SHEET METAL |
| J - J-BOX (CONTROL BOX) | V - VENTING |

To find the Raypak Part Number, refer to the parts list located on the page opposite to the exploded view drawing.

Now take the call-out you found in the exploded view and match it to the call-out in the left hand column. You will notice the parts are to groups. These are grouped into "Part Classes". See Example below.

Call-Out Column
